

ACADEMIC LEARNING COMPACTS

COLLEGE OF SCIENCES FORENSIC SCIENCE - B.S.

Discipline Specific Knowledge, Skills, Behavior and Values

1. Students will demonstrate proficiency in conducting scientific investigations.
2. Students will demonstrate their understanding of forensic science concepts.
3. Graduates will be adequately prepared for employment in a Forensics/Chemistry related field or for entry to graduate school.

Critical Thinking

1. Students will demonstrate proficiency in conducting scientific investigations.
2. Students will demonstrate their understanding of forensic science concepts.

Communication

1. Students will demonstrate proficiency in conducting scientific investigations.
2. Students will demonstrate their understanding of forensic science concepts.
3. Graduates will be adequately prepared for employment in a Forensics/Chemistry related field or for entry to graduate school.

Assessment of Forensic Science - B.S. Outcomes

These outcomes will be assessed using a variety of assessment methods, including:

- Tests
- Lab reports/experiments
- Projects
- Research papers
- Presentations
