Music Education - B.M.E.

Discipline Specific Knowledge, Skills, Behavior and Values

1. BME students will demonstrate the ability to effectively design assessment and use data to improve learning.
2. BME students will demonstrate knowledge of advanced musical repertoire, style, and traditions and the ability to perform in these capacities.
3. BME students will demonstrate a high level of musical knowledge and skill in the core curriculum.
4. BME students will effectively engage in improvement throughout the internship experience.
5. BME students will plan and implement music instruction that promotes critical thinking.
6. BME students will demonstrate an understanding of human development and learning when planning/implementing instruction.
7. BME students will demonstrate an understanding of diversity when planning and implementing music instruction, including effective communication with diverse types of students.
8. BME students will demonstrate the ability to effectively use multiple forms of technology to implement instruction and communicate throughout various forms of teaching.

Critical Thinking

1. BME students will demonstrate the ability to effectively design assessment and use data to improve learning.
2. BME students will demonstrate knowledge of advanced musical repertoire, style, and traditions and the ability to perform in these capacities.
3. BME students will demonstrate a high level of musical knowledge and skill in the core curriculum.
4. BME students will effectively engage in improvement throughout the internship experience.
5. BME students will plan and implement music instruction that promotes critical thinking.

6. BME students will demonstrate an understanding of human development and learning when planning/implementing instruction.
7. BME students will demonstrate an understanding of diversity when planning and implementing music instruction, including effective communication with diverse types of students.
8. BME students will demonstrate the ability to effectively use multiple forms of technology to implement instruction and communicate throughout various forms of teaching.

Communication

1. BME students will demonstrate a high level of musical knowledge and skill in the core curriculum.
2. BME students will demonstrate an understanding of human development and learning when planning/implementing instruction.
3. BME students will demonstrate an understanding of diversity when planning and implementing music instruction, including effective communication with diverse types of students.
4. BME students will demonstrate the ability to effectively use multiple forms of technology to implement instruction and communicate throughout various forms of teaching.

Assessment of Music Education - B.M.E. Outcomes

These outcomes will be assessed using a variety of assessment methods, including:

- Projects
- Portfolios
- Exams
- Recitals
- Presentations
