

Operational Excellence and Assessment Support

## Academic Learning Compacts

### College of Health and Public Affairs Academic Learning Compacts

#### Health Sciences - Pre-Clinical Allied Health, B.S.

UCF Health Sciences - Pre-Clinical Allied Health, B.S. graduates will demonstrate:

##### Discipline Specific Knowledge, Skills, Behavior and Values Outcomes

1. The ability to describe the concepts that provide the foundation of the health science preclinical curriculum, including those in anatomy and physiology, pathophysiology, nutrition, microbiology, and pharmacology.
2. Proficient basic and clinical science skills to successfully enter clinical graduate programs.
3. Professional skills in team-based projects that are essential to work as a vital member of the healthcare team.
4. Proficiency with appropriate teaching-learning experiences to design, implement, and evaluate educational experiences with CBL, TBL, PBL pedagogical approaches.

##### Critical Thinking Outcomes

5. Use critical thinking and decision-making skills to practice active inquiry and problem solving on basic science and clinical cases with evidence-based strategies.
6. Research and experimental design skills to investigate clinical disease and/or treatment protocols.

##### Communication Outcomes

7. Oral and written communication skills on administrative and policy healthcare issues.
8. Successfully articulate the role of the allied health care professional in the care of patients as a member of the healthcare team.

##### Assessment of Social Work Outcomes

These outcomes will be assessed using a variety of assessment methods, including:

- Tests
- Projects
- Papers
- Case presentations
- Oral reports

- Field instructor evaluations
- Surveys
